OFFICIAL COLOUR SCHEME OF EMBLEM

When the Emblem is printed or painted in more than one colour, the official colour scheme as given should be adhered to for the sake of uniformity.

However, in case of single colour printing, any one colour may be used throughout the emblem.

Reg. No. S/265 of 1967

The need to standardize the Association Emblem cannot be overemphasized. It is necessary in order to avoid a variation in the design, shape proportions and content of the emblem used on the letter-heads, banners, etc., of the various branches and at official functions. After consulting several senior members and after a painstaking search of the records available at the Head Office, the Central Council has approved the Emblem. All branches should follow the basic design, shape and colour scheme as given in their use, though the size may be altered as required without disturbing the proportions.

KNOW YOUR EMBLEM

The following is the significance and the rationale behind the Emblem design which projects the image of our Association.

1. **Head of the Elephant:** Adopted only in India, by the Indian Dental Association and it represents sagaciousness or thoughtfulness.
2. **Tusks of the Elephant:** They denote the dental profession and were used as far back as the Egyptian culture dates, to replace human teeth in the mouth with ivory. The tusks are most expensive and beautiful "teeth" known to mankind and thus stand for dentistry.
3. **The Staff of Aesculpius:** Stands for the Captor of authority and represents the professional authority of the Association.
4. **Serpents entwined around the Staff:** In 300 B.C., the God of Medicine and Healing of the Romans was Aesculpius who used serpents and a rod for healing. The Greek philosopher Hippocrates adopted this as a symbol of healing. It has since been associated with the medical science. Our emblem has two serpents entwined around the staff in opposite directions.
5. **Wings on the Staff:** Represent the spread of knowledge according to the Greek mythology wherein God Hermes had wings on his legs.

The Emblem has six small and three large divisions on the wings of either side of the staff.

The All India Dental Association, a Non-Government Organisation (NGO), was founded in 1946 under the able guidance of Dr Rafiuddin Ahmed, the doyen of dentistry in the country and the founder of the first dental college and hospital in India. Dr Rafiuddin Ahmed became its first President and continued for a three years term till 1948. IDA was formed to unite dental professionals across India and to foster education, improve awareness about oral health and enhance communication. Later the All India Dental Association became the Indian Dental Association, as it is known today. Thus, while registering the Association in 1967, for facilitation of registration under the Societies Registration Act, 1860, the address at Delhi was provided. However, Registered Head Office of the Association shall be where the Hon. Secretary General resides / practices and not any other place in India.

Today, Indian Dental Association has dental professionals as its members spread across the State and Local branches. Being an exclusive body of dentists in India, it effectively harnesses its vast resources aimed at attaining professional excellence in their day to day clinical and research activities and to ensure optimal oral health for all.
